**Re:** SRP SanTan Power Plant burning diesel fuel

When does "No mean no"?

As residents of Gilbert and of Western Skies Estates, we have closely followed the development of the SRP Expansion of the San Tan Power Plant and we attended the ACC meetings when this situation was discussed and, supposedly resolved. We were (and still remain) strongly opposed to this expansion which, unfortunately, will be placed in the middle of residential neighborhoods. However, even though we have been opposed to this expansion, we have felt comforted by the strict conditions which the ACC placed upon SRP which states that "diesel will not be allowed to be burned--period!"

Therefore, as concerned residents, we are asking you to please enforce the condition that SRP not be allowed to burn diesel fuel at the San Tan Power Plant!

Thank you for taking the time to read and consider our concerns in this matter.
